Conclusions and Recommendations

Location: 427966.00 mE, 4582746.00 mN. Purpose was to follow up after getting permitting completed. Site appears to have expanded a bit. Road leading to southeast area was blocked off by large rocks, apparently at the direction of MSHA. Blocked off area is where the safety station is located, but is accessible from road southwest of there. Weber County halted operations until Conditional Use Permit is in order. Only surface plucking from existing roads is allowed. No blasting and no crusher on site as reported. There is a portable sorter and a pair of grizzlies on site.
